

BALLISTIC DISK CHARGE (EPD)

USE

“EFP” charges adapted for:

- Perforations with a diameter of aprox. 20 mm and different depths, depending on the material of the target.
- They may be used for the low-order disposal of ordnance.

CHARACTERISTICS

Their most important characteristics are:

- They are ready for use.
- Their support system (“spider-legs”) permits their orientation in any position.
- They are built of light material.
- They are safe for handling.
- They are highly efficient in proportion to the explosive mass required.

TECHNICAL CHARACTERISTICS

Dimensions	Ø50 x 35 + 65 mm
Explosive material	41 + 95 g
Perforation	17 + 38 mm (comercial steel) Øaprox. 20 mm.
Stand/off	110 mm. (increasing the distance, smaller perforations may be obtained).
